

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

CLASSIFIED ADS**Living Microorganisms and Microscopic Slides**

We are successfully supplying several hundred schools, universities and colleges with microorganisms, especially Hydra and our mammoth strain of Amoeba. Successful shipment guaranteed to any part of America. Also high grade slides of microorganisms. Send for prices.

THE NEW Microscopical Lamp

THE LEITZ-LIGHT

To those having only the Winter evenings with the microscope, the Leitz-Light will prove a great comfort—*in fact an indispensable convenience.*

This lamp is a good substitute for daylight, as far as microscopic work is concerned.

It is a source of light and a warm-table combined.

The color screens modify the light, and the set screws enable one to adjust its direction to a nicety.

The

Science Record

A JOURNAL DEVOTED *to the* INTEREST *of the* SCIENCE TEACHER

*Published 10 times a year. Each
number contains about 36 pages.
Subscription \$2 per year*

The SCIENCE RECORD publishes articles of the following classes: 1. Short original contributions of general interest in natural science. 2. Description of new apparatus. 3. New methods in laboratory administration and general problems in science teaching.

About one-half of each number is devoted to *Reviews*. Books and articles appearing in other scientific journals which represent important advances or discoveries in science, are carefully reviewed so as to be interesting to the general reader. *This department is of special value to the science teacher who wishes to keep abreast of important scientific discoveries, but who has neither the time nor the opportunity to refer to the technical scientific periodicals.* A volume of the SCIENCE RECORD may, in fact, be looked upon as a *Year Book* or *Digest of significant discoveries* in Biology, Chemistry and Physics.

If interested, send for a sample copy
